N.B.—The Curriculum is constructed on the principle of encouraging a well-balanced and varied culture, and not with the view of stimulating extraordinary proficiency in particular departments. It will be seen in another part of the Calendar that there are a few *prizes* awarded to special excellence, but all candidates for honors are required to pursue the same course, and the estimate of merit will be based on an aggregate of all the subjects of the curriculum, including pass-work as well as honor-work. For pass-men the course is also uniform, with the exception of the two terms in which the option is allowed of French or Mathematics.

TERMS AND VACATIONS.

The Collegiate year begins on the *last Thursday* in August, and ends on the *second Wednesday* of May.

This period is divided into two Terms, between which there is a recess at Christmas of one week.

Convocation is held on the last day of the Collegiate year, and is followed by the Summer Vacation.

Candidates for admission may be examined either on the day after Convocation, or on the day before the opening in August.

EXPENSES.

Board in College Refectory, including furnished room and fuel, \$2 a week ; washing and lights extra.

The rooms are provided with stoves, beds, bedsteads, chairs, and tables ; other necessary articles the students provide for themselves.

Board may be had also in private families at prices varying from \$2 to \$2 50 a week.

Tuition, \$12 a term, or \$24 for the year. The charge is the same whatever studies are pursued.

Payment for tuition is required *in advance* for each term ; for board *in advance* for each half term.

The charge for *incidentals* is \$4 per annum, payable on admission.

Any student wishing to attend the College on a Scholarship must bring an order from the owner of the Scholarship.

No Scholarship is available unless paid up in full.

The total expense for board, washing, light, instruction, and incidentals will range between \$90 and \$120 a year.

PRIZES.

The sum of \$800 was generously given to the College by His Royal Highness the Prince of Wales, on the occasion of his recent visit to the Province, with a view to the establishment of Prizes. This money has been duly invested by the authorities of the College, and the interest will be annually expended in the bestowment of a Gold and a Silver Medal, to be styled respectively the Prince of Wales Gold Medal, and the Prince of Wales Silver Medal.

The Prince's Gold Medal will be awarded to that student of the graduating class who may have obtained the highest standing in all the prescribed subjects of the curriculum, during the four years of study.

The Prince's Silver Medal will be awarded in the same way to the second-best student of the graduating class.

In addition to the above three prizes have been established by John George Hodgins, Esq., LL.B., Deputy Superintendent of Education, who, several years since, donated the handsome sum of \$635 for their permanent endowment.

The first of these is styled the *Ryerson* prize, the second the *Webster* prize, and the third the *Hodgins* prize. The *Ryerson* prize will be annually awarded to that member of the Freshman class who may evince the best knowledge of Scripture History; the *Webster* and *Hodgins* prizes are open for competition to the Junior and Senior classes, and will be awarded to the respective authors of the first and second best English essays on such subjects as may be assigned by the Senate.

DEGREE OF M. A.

This degree is conferred in course on all Bachelors in Arts of three years standing, whose mental improvement and moral character have appeared satisfactory to the authorities of the University. Application must be made by letter to the President, one month prior to Convocation. The fee is the same as for the degree of B. A.

DISCIPLINE.

Students connected with the College will be expected to conduct themselves with propriety, and to observe all regulations imposed by the President and Faculty.

A record is kept of each Student's deportment, and will be furnished to parents in special cases.

Students whose conduct or progress in study is unsatisfactory, will not be allowed to remain in the Institution.

RELIGIOUS SERVICES.

All students are required to attend Divine Service on the Sabbath, at such Churches as their parents or guardians may prefer.

They are also required to attend daily prayers, with the reading of the Holy Scriptures, in the College Chapel.

An effort is thus made to secure a healthful moral and religious influence, but the inculcation of sectarian views will be avoided.

Faculty of Medicine.

This Faculty will be conducted in Toronto, as heretofore, and those who complete the prescribed curriculum, and pass a satisfactory examination, will receive the degree of Doctor of Medicine from the Senate of the University.

The WINTER Session always begins on the 1st of October in each year, and ends on the 30th March following.

The SUMMER Session immediately follows and continues till the 30th of September following.

The usual vacations at Christmas and New Years are allowed.

The fees for two Winter Sessions, \$186; for one Session, \$100; Summer Session, \$35.

Additional information may be obtained from the Hon. John Rolph, M.D., LL.D., Dean of the Medical Faculty, Toronto, as well as from the following extract from the last announcement of the Faculty :

“ It is a matter of congratulation, that this university enjoys such great and increasing favour throughout the country. The Medical Department shares this prosperity, which has been increasing every year, and this guarantee of public confidence is a matter which claims and receives a grateful acknowledgment.

“ The graduates, ever so remarkably welcomed wherever they settle, carry with them the fruits of their academic labour, and reflect back, as the reward of their untiring instruction, the grateful tidings of their well-earned reputation and extended usefulness. It is under such encouragement, realized in past

years, that the public is assured of unabated zeal in the future fulfilment of its just expectations.

“It is with the view of deserving and maintaining this high position, that the Faculty of this Department have resolved to continue their usual Summer Session, and to do so upon an enlarged scale.

“This is done under a conviction that it will most materially promote the improvement of pupils at that time commencing their studies, as well as the improvement of more advanced students, who desire in a higher degree to mature their knowledge and avail themselves of practical opportunities of seeing disease.

“Although students are not required by any statute, yet they are strongly recommended by the Faculty to attend the classes in Arts in Victoria College, Cobourg, by which course they will derive important advantages in the pursuit of their medical studies. Besides matriculating in classics, they would acquire a knowledge of Natural Philosophy, and by the study of Chemistry and Physiology they would pass one year out of the four required by the curriculum.

“The Matriculation Examination (giving satisfactory evidence of the student’s classical and general attainments) may be passed at any time before graduation; and the following works in the classics are recommended, out of which the pupil may choose the one in which to be examined, viz: The London Pharmacopœia, Gregory’s Conspectus, Sallust’s Catilina, or any other Latin author.

“He will also (before graduation) be required to compose a *Thesis* upon some medical subject, approved by the Faculty.

“A pupil being 21 years of age, having pursued his medical studies for four years, and having attended two full six months’ winter courses can be admitted to an examination for graduation.

“When a pupil seeks to graduate in THREE years (the period

required by the GOVERNMENT MEDICAL BOARD), he must give satisfactory evidence of his preliminary fitness, and must attend THREE full winter courses of Lectures (the third course being free.)

“When the pupil claims to have been TWO years in the pursuit of medical knowledge, he must satisfy the College, by a preliminary examination, that he has the presumed attainments.

“Twelve months’ attendance at some General Hospital, or advantages equivalent to it, will be required. The lying-in Hospital is open to pupils.

“Anatomy is not only taught from the recent subject, but is also illustrated by the various preparations, and by a full set of plates of the size of life, as well as by the best European models, which have been purchased for the purpose.

“Besides the principles of Surgery, its practice is taught and illustrated by apparatus of various kinds, connected with its details, so as to familiarise the student with the most approved methods of adjustment and operation. With this are connected various specimens of surgical Pathology.

“Medicine is taught in its principles and practice, as well by ample morbid illustrations of the effects and changes of disease, with the additional aid of the microscope.

“Materia Medica is practically taught and illustrated by specimens; and the nature and effects of medicine and the modes of operation fully explained. Medical Jurisprudence, associated with this branch, puts the student in possession of that elementary information, which will at all times aid his research in the future, on trying occasions, and enable him to deliver his testimony in a court of justice in a satisfactory manner.

“Midwifery is taught with the diseases of women and children in the most practical manner, with the usual aid of

a model, and illustrated by plates of the size of life, so as to familiarise the student with the highly important duties which he has practically to carry out at the maternity, as well as in future practice.

“Physiology will be taught by the aid of the microscope, and of a large collection of microscopic specimens, displaying the interior structure of the tissues and organs, as well as representing the physiological characters of the different fluids of the body.

“The functions of digestion and of the nervous system will also be demonstrated by actual experiments on the lower animals.

“Chemistry includes the principles of the science; and while inorganic chemistry is duly taught, the student is fully instructed in organic chemistry as applicable to medicine and toxicology. The Lectures are fully illustrated by experiments, and by an ample laboratory.

“The Museum is under the care and superintendence of the curator, and will contain not only illustrations of natural history, but whatever is deemed most conducive to the study of medical science in its various branches; for this purpose, large additions have been lately made and accommodation provided.

“The demonstrator of Anatomy will give personal attendance in the dissecting room, to superintend and assist the students in their pursuit of practical Anatomy, from 9 o'clock, A.M., till 3 o'clock, P.M.”

There are two Scholarships, of the value of \$100 each, open to competition in the Medical Department. They will be awarded on the ground of merit in Arts to matriculants or graduates in that Faculty of the preceding year.

Faculty of Law.
